Descriptors- Associate Degrees, *Bachelors Degrees, *Doctoral Degrees, *Higher Education, *Masters Degrees
Identifiers- *1966 67

The 773,375 bachelor's and higher degrees conferred by 1,565 institutions during 1966-67 was the largest number in US history and represented an increase of almost 59,000 or 8% since 1965-66, a rate of increase that seems to have stabilized over the last 3 years. Tables provide summary data by level of degree, field of specialization, sex of recipient, state, level of institution and institutional control. Publicly controlled institutions accounted for about 60% of degrees earned, an increase of about 11% over the 1965-66 figure. Men received about 62% of all degrees--about 58% of all bachelor's, about 96% of all first-professional degrees, about 65% of all master's and about 88% of all doctorates. At the bachelor's and master's levels, more degrees were awarded in elementary education than in any other field. Law led the first-professional level and chemistry led in doctorates. The one Table concerned with awards below the bachelor's level summarizes the number of associate degrees awarded by sex, institutional control and type. A copy of the questionnaire used to gether this information and instructions to respondents are reproduced in the appendix. Part B of the Earned Degree Report will provide the detailed listing of the number of degrees granted by each institution within each specific field of study. (JS)

HIGHLIGHTS

1. The 773,375 degrees conferred at bachelor's and higher levels during 1966-67 was the largest number in history, an increase of almost 59,000 (or 8 percent) over 1965-66. The 1966-67 figure represents an 88 percent rise over the 411,058 degrees granted a decade earlier (1956-57).

2. The yearly rate of increase for bachelor's and higher degrees seems to have stabilized at about 8 percent over the last three years reported.

3. Bachelor's, first-professional, master's, and doctor's degrees increased 7 percent, 3 percent, 12 percent, and 13 percent, respectively, over the 1965-66 figures.

4. Publicly controlled institutions accounted for about 60 percent of all degrees in 1966-67. The total for publicly controlled institutions was about 11 percent above the 1965-66 figure; for privately controlled institutions, the rise was only about 4 percent.

5. Men received about 62 percent of all degrees, the sameas in the previous year. The percent of degrees awarded to men in 1966-67 varied markedly from one degree level to another. Men were awarded about 58 percent of all bachelor's degrees, about 96 percent of all first-professional degrees, about 65 percent of all master's degrees, and about 88 percent of all doctorates.

6. At the bachelor's and master's levels, more degrees were awarded in elementary education than in any other field. Law led at the first-professional level, and chemistry led in doctorates. At each level, the same field ranked first in 1965-66.

APPENDIX

Reproduction of Survey Report Form............................... 61

INTRODUCTION

In the twelve-month period from July 1, 1966 through July 30, 1967, a total of 773,375 bachelor's and higher degrees were conferred by 1,565 institutions in the United States. This is the largest number of degrees in U.S. history, representing an increase of 8.2 percent over the total of 714,624 degrees conferred in 1965-66.

The present publication is the 20th annual report of earned degrees issued by the Office of Education. Limited information on this subject for 1872 through 1916 was published as part of the Annual Report of the Commissioner of Education, and from 1917-18 through 1945-46 in the Biennial Survey of Education. The present series began in 1947-48.

The tables in this report provide summary data by level of degree, field of specialization, sex of recipient, State, level of institution, and institutional control. A detailed listing which shows degrees conferred in each field by each institution will be provided in a separate publication. The decision to publish the 1966-67 survey of bachelor's and higher degrees in two parts was dictated largely by considerations of printing time; this division of the complete report makes extensive summary data available on a more timely basis than would otherwise be possible. A third publication will provide information on awards below the bachelor's level.

A copy of the 1966-67 questionnaire and of the instructions to respondents is reproduced in the appendix of this report. Part A of the questionnaire, dealing with bachelor's and higher degrees, was identical in the 1965-66 and 1966-67 surveys. Thus, results for the two years may be considered to be quite comparable. However, caution must be exercised in comparisons involving years prior to 1965-66. The primary difficulty in making such comparisons stems from the fact that degree levels were redefined for the 1965-66 survey. (For a detailed description of the differences between the 1965-66 survey and previous surveys, see Earned Degrees Conferred 1965-66, OE-54013-66.)

COVERAGE OF INSTITUTIONS

This summary of bachelor's and higher degrees is based on data for a total of 1,565 institutions. These 1,565 colleges and universities are all of the institutions in the Office of Education's higher education survey universe which are known to have granted bachelor's or higher degrees during the period during the period 1966-67. (See Opening Fall Enrollment in Higher Education, 1967, OE-54003-67, for a description of the survey universe.) Since the survey covered awards below the bachelor's level as well as bachelor's and higher degrees, questionnaires were sent

to all institutions in the higher education survey universe, regardless of degree-granting status.

Among the 1,565 institutions included in the summary of bachelor's and higher degrees, seven failed to provide data on degrees granted in 1966-67. For these seven institutions, data from the last available survey-report were used in lieu of more current information. The institutions for which the older data were substituted are listed below, together with numbers of bachelor's and higher degrees involved:

Institutions for which 1966-67 survey data were missing	Most recent survey report	Number of degrees in most recent report
Electronic Technical Institute (California)	1965-66	4
Yale University (Connecticut)	1964-65	2,261
Columbia Theological Seminary (Georgia)	1965-66	76
Rockford College (Illinois)	1965-66	118
Woodstock College (Maryland)	1965-66	74
University of Massachusetts	1965-66	2,091
Northwestern Lutheran Theological Seminary (Minnesota)	1965-66	19

These seven institutions account for less than 1 percent of the bachelor's and higher degrees granted in the Nation; the total for the seven, based on the above figures, is less than 5,000. Thus, it is doubtful that substitution of the non-current data seriously distorts the over-all summary figures in this report.

ORGANIZATION OF THE TABLES

To facilitate comparisons, tables based on the 1966-67 survey are parallel to those provided in the 1965-66 report. However, one major change has been introduced: Data on bachelor's and higher degrees for 1966-67 are being published in two separate documents. The present report, Part A, includes all the summary tables plus one institutional listing (table 10, showing degrees granted at each level by each institution, without regard to field of study). Part B of the Earned Degree report will provide the detailed listing of the number of degrees granted by each institution within each specific field of study.

Table 1 presents a brief historical summary of degrees granted from 1960-61 through the period covered by the present survey. As noted earlier, rigorous year-to-year comparisons by type of degree are not possible because of redefinitions of degree-levels.

Table 2 is an overall summary of bachelor's and higher degrees granted, by sex and by institutional level and control. For this table, four-year institutions were classified into two groups, universities and all other four-year. Classified as universities are institutions which give considerable stress to graduate instruction, which confer advanced degrees as well as bachelor's degrees in a variety of liberal arts fields, and which have at least two professional schools that are not exclusively technological. Four-year institutions not meeting these criteria make up the "all other four-year" group.

Tables 3 through 10 provide counts of men and women at each of the four degree levels (bachelor's, first-professional, master's, and doctor's), with other classifications varying from table to table. All of these tables are based on Part A of the questionnaire.

Table 11 is the only table in this publication concerned with awards below the bachelor's level. This table, based on Part B of the questionnaire, summarizes the number of associate degrees, by sex and by institutional control and type.

In the tables of this report, totals have not been rounded but are given as they were obtained by simple addition of the figures for individual institutions. This presentation in no way implies that totals and subtotals are accurate to the last digit. It was believed, however, that the data could be more conveniently used if the many subtotals obtained in the analysis were reported in such a way that they would add arithmetically to the totals.

1/ For the years 1960-61 through 1964-65, includes only four-year bachelor's degrees; for 1965-66 and 1966-67, includes four-year and five-year bachelor's degrees.

2/ For the years 1960-61 through 1964-65, includes all first degrees in a given field which require 5 or more years of college work; for 1965-66 and 1966-67, includes only those first-professional degrees based on programs which require at least 2 years of college work for admission and a total of 6 or more years of college work for the degree.

3/ For the years 1960-61 through 1964-65, excludes those master's degrees considered first-professional, e.g., Master of Library Science, Master of Social Work, Master of Business Administration in some institutions, etc.; such degrees are included in the column headed "First-professional". For 1965-66 and 1966-67, all master's degree are reported in the column headed "Master's".

4/ Because of the variations in definitions noted above, percent changes for 1965-66 cannot be taken at face value. The precise effect of the redefinitions is not known. However, it is estimated that if degrees for 1964-65 and for 1965-66 had been classified according to the same definitions, bachelor's, first-professional, and master's degrees would have increased by about 5 percent, 12 percent, and 15 percent, respectively.

SCHEDULE 1.--DEGREES AND OTHER FORMAL AWARDS CONFERRED BETWEEN JULY 1, 1966 AND JUNE 30, 1967

This schedule seeks information on degrees and other formal awards earned during the 1966 summer session and the 1966-67 academic year. These data help to meet the needs of institutions of higher education and others for factual data on the fields of study of college graduates and on the manpower resources of the Nation.

Please examine the definitions and instructions which accompany each schedule. If you need additional clarification on any of the items, please call Mr. Paul Mason, area code (202) 962-7304, Washington, D. C.

Please read the instructions before entering the data for your institution. Paragraph No. 5, Grouping of Subject Fields, which explains the arrangement of the form, and paragraph No. 6, Skipping Inapplicable Sections, should help to expedite completion of the schedule without impairing its accuracy or completeness.

NOTE: THE DATA PROVIDED IN THIS SURVEY MUST BE TYPED ON THESE FORMS, SINCE THEY WILL BE PROCESSED BY CHARACTER-READING OPTICAL SCANNING EQUIPMENT. PLEASE BE SURE THAT THE TYPEWRITER IS IN GOOD CONDITION, THAT THE KEYS ARE CLEAN, AND THAT THE RIBBON IS NEW. NYLON OR ONE-TIME PLASTIC BLACK RIBBONS PRODUCE THE BEST RESULTS. THE TYPING SHOULD BE CONFINED TO THE SPACE WITHIN THE PURPLE OUTLINES OR BOXES. PLEASE USE ONLY NUMBERS FOR ALL DATES, IN MONTH, DAY, AND YEAR SEQUENCE. STRIKEOVERS AND ERASURES SHOULD BE AVOIDED.

1. PROMPTNESS. Registrars are respectfully requested to complete the report-form by October 1, 1967.

If degrees or other awards were conferred in 1966-67 for the FIRST TIME in a field of study new to your institution, please place a check mark beside the item number. This will save correspondence later regarding the entry.

2. INCLUSIVE DATES. Report degrees conferred from July 1, 1966 through June 30, 1967 including those granted at the end of the 1966 summer session.

3. BRANCH INSTITUTIONS. Please be sure to indicate, on the first page of the report-form, whether your report includes or excludes degrees awarded to students at branches (if any) of your institution. (Please do not include degrees granted by branches outside the United States, its Territories, or possessions.)

PART A.--BACHELOR'S AND HIGHER DEGREES

4. TYPE OF DEGREES. Report EARNED degrees (not honorary) based on at least 4 years of college work or the equivalent thereof. Report certificates and diplomas if these are equivalent to a bachelor's degree. Do NOT report "Associate in Arts" or similar awards below the bachelor's degree in Part A; these should be reported in Part B. Do NOT report certificates for course work beyond the bachelor's but below the master's degree (such intermediate accomplishment falls outside the scope of the present survey).

5. GROUPING OF SUBJECT-FIELDS. Glance through the report-form to observe how the various fields of study have been grouped. Most of the subject-fields have been classified under the following 18 boldly capitalized headings:

AGRICULTURE
BIOLOGICAL SCIENCES
BUSINESS AND COMMERCE
COMPUTER SCIENCE AND SYSTEMS ANALYSIS
EDUCATION
ENGINEERING
ENGLISH AND JOURNALISM
FINE AND APPLIED ARTS
FOREIGN LANGUAGES AND LITERATURE
HEALTH PROFESSIONS
HOME ECONOMICS
MATHEMATICAL SUBJECTS
MILITARY SCIENCES
PHILOSOPHY
PHYSICAL SCIENCES
PSYCHOLOGY
RELIGION
SOCIAL SCIENCES

A few fields, such as Architecture, City Planning, Folklore, Forestry, Law, and Records Management have been listed independently with boldly capitalized headings. A glance through the form will suffice to identify these headings. Attention is also called to the "Broad General Curriculums and Miscellaneous Fields" on the last page of the report-form.

6. SKIPPING INAPPLICABLE SECTIONS. If your institution does not grant degrees in the area covered by a boldly capitalized heading, you may SKIP ALL THE ITEMS UNDER THAT HEADING. Thus, most registrars will properly skip the entire section headed "Agriculture." Similarly, many will properly skip the sections on "Health Professions" and on "Religion." Technological schools will generally skip the section on "Fine and Applied Arts." Men's colleges will skip the section on "Home Economics." Appropriate skipping can speed the completion of your report without injury to quality or accuracy.

7. NUMBER OF DEGREES. Report all degrees (within the limitations of paragraphs 2 - 4 above). If a student earned two degrees between July 1, 1966 and June 30, 1967 (e.g., a bachelor's degree at the end of the summer session and a master's degree at the end of the following academic year), report both degrees, each classified separately. This is a survey of degrees conferred, not necessarily a count of different students receiving degrees.

8. CATEGORY OF DEGREES.

(a) Report all BACHELOR'S DEGREES requiring at least 4 but not more than 5 years of academic work in columns 2-3 of the report-form. Also, report ALL Bachelor's degrees conferred in a CO-OPERATIVE PLAN or PROGRAM (also referred to as WORK-STUDY PLAN or PROGRAM) in columns 2-3. A cooperative plan provides for alternate class attendance and employment in business, industry, or government; thus, it allows the student to combine actual work experience with his college studies.

(b) FIRST PROFESSIONAL DEGREES IN SELECTED FIELDS. The first professional degrees to be reported in columns 4-5 are those degrees which signify the completion of the academic requirements for selected professions, which are based on programs which require at least two academic years of previous college work for entrance and which require a total of at least six academic years of college work for completion. Specifically, include in columns 4 and 5 professional degrees in Dentistry (D.D.S. or D.M.D.), Law (LL.B. or J.D.), Medicine (M.D.), Theology (B.D.), Veterinary Medicine (D.V.M.), Chiropody or Podiatry (D.S.C. or D.P.), Optometry (O.D.), and Osteopathy (D.O.).

Report all master's degrees in columns 6 and 7 (even though the master's is required in some fields, such as Library Science and Social Work, for employment at the professional level and even though as in the case of Social Work 4 years of undergraduate work are required for entrance into the program and an additional 2 years for completion).

(c) MASTER'S DEGREES. The master's degree in liberal arts and sciences is the degree customarily granted upon successful completion of one (sometimes two) academic years of work beyond the bachelor's degree. The master's degree in professional fields (see P. 8b above) is an advanced degree beyond the first professional but below the Ph.D. degree (e.g., the LL.M.; M.S. in Surgery, following the M.D. ; M.S.D.; Master of Science in Dentistry; etc.). Report all master's in columns 6 and 7.

(d) DOCTORATE. The doctorate classification includes such degrees as Doctor of Education, Doctor of Juridical Science, Doctor of Public Health, and the Ph.D. degree in any field whether Agronomy, Food Technology, Education, Engineering, Public Administration, Ophthalmology, Radiology, etc. (In the case of the Doctor of Public Health, the prior professional degree is generally earned in the closely related professional field of medicine or of sanitary engineering.) Please report the doctor's degrees (except when such degrees are first professional as stated in paragraph 8b above) in columns 8-9 of the report-form.

9. CLASSIFICATION OF DEGREES WITH RESPECT TO MAJOR FIELD OF STUDY.

(a) Specific Classification. Classify degrees as SPECIFICALLY as the list of fields in the report-form permits. Thus, a bachelor's degree in Business Administration with a major in Accounting should be reported in "Accounting" (item 2002), NOT in "Business and Commerce, general" (item 2001).

(b) Degree of Doctor of Philosophy. Classify the Doctor of Philosophy degree according to the student's major field of study. Thus, a Ph.D. in chemistry should be reported as a degree in "Chemistry," NOT as one in "Philosophy."

(c) Teaching Majors. The general rule is to classify degrees according to the major area of specialization. This means, in general, that degrees of students who have prepared to teach an academic subject, such as English, Biology, Mathematics, and Social Studies (herein termed "Social Sciences"), should be reported in English (item 2901), Biology (1704), Mathematics (5601), Social Sciences (7701), etc.--and NOT in "Secondary Education" (2359). On the other hand, the degrees of students who have prepared to teach such special subjects as Agriculture, Art, Music, etc. should be reported in Agricultural Education (item 2319), Art Education (2322), and Music Education (2336) (items 2301-2342 of the report-form). (The system of reporting prescribed in this paragraph fits in with, and supplements, data available from other sources.)

(d) "Split" and "Double" Majors. When a student graduates with a "split" major or a "double" major - e.g., in Spanish and French - report the degree either in the area of greater specialization, or as half a degree (.5) in French and half a degree (.5) in Spanish. (If the "split" or "double" involved Spanish and an unlisted language, the second language would be represented by "Other languages"). Similarly, in the case of a student with a "split" or "double" major in Biology and Chemistry, report the degree in the area of greater specialization or as (.5) degree in Biology and (.5) degree in Chemistry.

(e) Unlisted Fields of Study. Degrees in fields which are not listed in the report-form should be classified as follows:

If appropriate, consolidate with a listed field of study. Thus, a degree with a major in -

Sculpture should be reported in "Fine & Applied Arts, other major fields";

Astrophysics should be reported in "Astronomy" (item 6804);

Geochemistry should be reported in "Earth Science, all other" (item 6828);

Criminology should be reported in "Sociology" (item 7725);

Police Administration should be reported in "Applied Social Sciences, all other" (item 7746);

Industrial Design should be reported in "Fine & Applied Arts, other specific major fields" (item 3213) or in "Architecture" (item 1400)--depending on the nature of the curriculum; and so on.

(f) General Majors. The term "general major" is used to designate diversified curriculums within an area of study. Ordinarly, degrees based on a general major should be reported in one of the "general" categories of the report-form (such as "Physical Sciences, general," (item 6801); "Social Sciences, general" (7701); "Arts, general program" (8304); etc.). Thus a degree based on concentration in history-government-economics or in anthropology-psychology-sociology, should be reported in "Social Sciences, general."

(g) Inter-area fields of study. Item 8313 is for reporting fields of study which represent two or more broad SUBJECT AREAS. For example, MASS COMMUNICATIONS, encompassing segments of PSYCHOLOGY, EDUCATION, BUSINESS, JOURNALISM, SOCIAL SCIENCES, FINE ARTS, etc., should be reported here. Specify the name of the inter-area field of study, when reporting in Item 8313, and list the code numbers of the major SUBJECT AREAS which it represents.

If the field of study does not fit into any of the listed items, name the field and enter the number of degrees in the field under item 8314), "Fields of Study Not Listed Above."

10. PREPARATION OF TEACHERS. In addition to the general need for these data, Item 9900 was added at the request of some institutions of higher education whose eligibility for certain grants is depepdent on the preparation of teachers.

PART B.--DEGREES AND COMPLETIONS BASED ON LESS THAN 4 YEARS

11. Report in Section 1 all associate degrees requiring at least 2 but less than 4 years of work beyond high school, including associate degrees reported in columns 2 and 3 of Sections 2, 3, and 4.

12. Report in Sections 3 and 4 completions of ONLY whole curriculums, NOT individual courses. For purposes of this survey, an ORGANIZED CURRICULUM is one which meets all four of the following criteria:

a. High school graduation (or its equivalent), but no work beyond high school, is required for admission to the curriculum. The general level of these curriculums is the first one to three years beyond high school.

b. The curriculum is a series of required and elective courses constituting an integrated program designed to prepare students for immediate employment in a specific occupation or cluster of occupations. A group of courses, even though all of them are in a given subject area, do not necessarily constitute a curriculum.

c. Completion of the curriculum requires at least one but less than four years of full-time attendance, or the equivalent in part-time attendance over a longer period. A "year" means an academic year of approximately nine months.

d. The curriculum leads to any type of formal recognition (certificate, associate degree, diploma, a transcript recognizing successful completion, a statement of completion from an administrator of your institution, or other formal recognition) signifying that the student has completed an organized curriculum; or the State grants a license or other formal recognition, upon examination, to all graduates of the curriculum.

Report in columns 2 through 5 of Sections 3 and 4 only those associate degrees, diplomas, certificates, or other formal awards signifying the completion of organized curriculums which prepare for occupational competence in the specified fields or areas. The associate degrees reported here should also be included in the totals requested in Section 1. Formal awards other than associate degrees in organized occupational curriculums should be reported in Sections 3 and 4.

** Distinguish "PRE-MEDICAL, PRE-DENTAL, and PRE-VETERINARY SCIENCES" from "BIOLOGY, GENERAL, item 1704". The former, in general, includes curriculums in which the pre-medical sciences predominate, without specialization in any one specific subject. The last year or two of such a curriculum is frequently taken in a MEDICAL, DENTAL, or VETERINARY school. "BIOLOGY, GENERAL" typically includes curriculums oriented toward preparation for the teaching of biology in high school or college, or toward further specialized study in such fields as MICROBIOLOGY, ENTOMOLOGY, GENETICS, etc. When the distinction between items 1701 and 1704 is difficult to make, classify in the broader category (item 1704).*

NOTE: *Students intending after graduation to enter schools of MEDICINE, DENTISTRY, or VETERINARY MEDICINE are not necessarily enrolled in PRE-MEDICAL, PRE-DENTAL, or PRE-VETERINARY programs (item 1701); some of them choose to take more specialized programs, in which case their degrees should be reported in item 1713, "ANATOMY and HISTOLOGY," item 1721, "BIOCHEMISTRY," etc.*
